

EDCTP-CSA-Ebola-337 ENDORSE “Enhancing individual and institutional infectious Disease Outbreaks Response capacities of healthcare professionals to mitigate infectious Emergencies in the Northern Uganda region”

ENDORSE Train the Trainers (T-t-T) Course - Phase 1

24-29 APRIL 2017, ST. MARY’S HOSPITAL LACOR, GULU (UGANDA)

Intelligent People Exercise

PURPOSE:

The aim of this exercise is to help people reflect on the fact that there are many different ways in which people are intelligent.

PROCESS:

1. Invite each person alone to think of 5 people from different walks in life, whom they think must be very intelligent. Ask them to list their names and then ask themselves: What is it about each one that makes you say they are intelligent? Are they all intelligent in the same way? What are the differences between them? □
2. Participants form small groups of 4/5 and each person shares their list of intelligent people with the others, and the reasons why they think each person is intelligent. □
3. Each group draws up a list of ways in which people can be intelligent. □
4. The small groups present their lists back to the large group, displaying them around the walls of the room. □
5. Each person joins with one or two others, and together they move around the room stopping at each list and sharing, which types of intelligence fit and apply, to them. □
6. Everyone returns to large group and anyone who wishes to do so is invited to share any insight they had about themselves or about the exercise. □
7. Distribute Hand-out: different Kinds of Intelligence - from Partners Training for Transformation, Dublin, Ireland}
